

FAMILY TIME IN THE WINTER FOREST

Explore the winter forest with open eyes: gather knowledge, read tracks and get creative. Depending on the weather, you will either dive into the world of the spruce tree - discovering how this healing tree is used and preparing a traditional resin salve together with Theresa. Or set off on an exciting wildlife tracking adventure in the snow: get to know the animals of the forest, learn how to read their tracks and create imaginative land art using natural materials.

Whether learning about spruce trees or following animal tracks - there is plenty to discover, laugh about and explore. A wonderful experience for the whole family.
